

WATER SHUTOFF NOTICE & WINTER INSULATION POLICY

ATTENTION CAMPERS! : WEDNESDAY, OCTOBER 1st
Water hydrants at Sites #1 – 25 will be shut off for the season.
Water hydrants at Sites #26 – 57 will remain on.

All campers are **REQUIRED** to have heat tape on water lines from camper to outside faucet. Our **MAINTENANCE DEPARTMENT** will provide cover insulation over the drain back faucet.

At some point during the upcoming winter season, we will experience extremely cold winds that can affect the underside of a camper. It is advisable to cover any area that might increase the possibility of experiencing frozen water lines.

A friendly reminder from the Phillips County Maintenance Department.

Thank you for your cooperation!
